Summary

We tested whether a vision model can read one photo of a watch and return its **exact manufacturer reference number**, the field ChronoBay needs to pre-fill a resale listing. Each model saw the same 100 photos (10 watches from each of 10 luxury brands) with the same instructions, and every answer was scored against a hand-verified answer key.

- **Claude Opus 5.5 is the most accurate:** 79 of 100 exact (84 counting accepted look-alikes), brand right on all 100, at \$0.022 per image and 6.2s median.
- **Claude Sonnet 5.5 (thinking off) is the best value:** 72 of 100 exact at \$0.0084 per image, about a third of Opus's cost, and the fastest usable model (2.5s median).
- **DeepSeek Flash is cheapest but much weaker:** 48 of 100, and it sometimes answered with another brand's reference. **Claude Haiku 4.5 is not usable** for this task: 11 of 100, and it is confidently wrong.
- **Confidence is useful for Opus:** all 19 answers it rated 0.8 or higher were exactly right, a safe basis for automatic pre-filling. Lower-confidence answers should be confirmed by the seller.
- **Why models miss:** they nearly always recognise the watch (Opus named the right model in 20 of its 21 misses); they fail at recalling the exact catalog number, e.g. a neighbouring dial variant or the previous generation's reference.

Recommendation. Use Claude Opus 5.5 where accuracy matters most, or Claude Sonnet 5.5 for high volume at low cost. In the product, let the model identify brand and model, then choose the reference from ChronoBay's own catalog for that model instead of recalling it from memory. This targets the main cause of the remaining errors.

1. What was tested

Dataset

100 photos: 10 watches each from Rolex, Omega, Patek Philippe, Audemars Piguet, TAG Heuer, Breitling, Cartier, IWC, Jaeger-LeCoultre and Vacheron Constantin. The photos are real-world images (wrist shots, retailer photos) collected from the web. Every answer-key row was checked against the brand's website or a major retailer; 12 rows were corrected during that audit before any model was run.

Task

Each model received one photo and the same instructions, and had to answer in a fixed JSON format: brand, model family, reference number, movement, case material, strap/bracelet material, and a 0–1 confidence that the reference is exactly right. The instructions ask for a single best guess (never “unknown”) in the brand's official format.

Models

Model	Settings	Price per million tokens (input / output)
Claude Opus 5.5	effort medium, thinking on	\$4 / \$20
Claude Sonnet 5.5	thinking off	\$2 / \$10
DeepSeek Flash	prompt-mode JSON, images capped at 1,024 tokens	\$0.15–0.30 / \$0.60–1.20 (off-peak / peak)
Claude Haiku 4.5	no thinking	\$1 / \$5

How answers are scored

- Exact reference** (headline): the answer is the answer-key reference. Notation is normalised first (case, spaces, dots, dashes and slashes are ignored).
- Including accepted look-alikes**: also counts references a photo cannot tell apart (another size or the previous generation, listed per watch in the answer key) and the same watch on another strap.
- Errors** (timeouts, invalid JSON) count as misses. Cost is measured from each call's token usage at published prices; time is wall-clock per call.

2. Results

	Claude Opus 5.5	Claude Sonnet 5.5	DeepSeek Flash	Claude Haiku 4.5
Exact reference	79/100	72/100	48/100	11/100
Incl. accepted look-alikes	84/100	77/100	53/100	16/100
Brand right	100/100	100/100	93/100	89/100
Right when confidence ≥ 0.8	19 of 19	11 of 12	9 of 11	3 of 19
Errors (no usable answer)	0	0	2	0
Cost per image	\$0.0223	\$0.0084	\$0.0013	\$0.0025
Cost for 100 images	\$2.23	\$0.84	\$0.13	\$0.25
Cost per 1,000 listings	\$22.30	\$8.44	\$1.30	\$2.51
Median time per image	6.2s	2.5s	4.9s	1.5s
95th-percentile time	10.8s	3.6s	43.5s	3.1s
Avg input / output tokens	3,796 / 355	3,795 / 85	1,249 / 1,916	2,165 / 68

Accuracy

Accuracy vs cost

Up and to the left is better. Opus costs about 2.6× Sonnet for 7 more exact answers per 100; Sonnet costs about 6.5× DeepSeek for 24 more.

Speed

Bars show the median time per image; the dashed line runs to the 95th percentile. DeepSeek's slowest 5% took over 40 seconds.

3. Results by brand

Exact references out of 10 per brand. Darker green is better.

Brand	Claude Opus 5.5	Claude Sonnet 5.5	DeepSeek Flash	Claude Haiku 4.5
Audemars Piguet	7/10	6/10	2/10	1/10
Breitling	7/10	9/10	3/10	0/10
Cartier	8/10	6/10	6/10	0/10
IWC	7/10	9/10	3/10	1/10
Jaeger-LeCoultre	7/10	4/10	3/10	1/10
Omega	7/10	6/10	6/10	3/10
Patek Philippe	10/10	8/10	6/10	2/10
Rolex	10/10	10/10	8/10	2/10
Tag Heuer	9/10	6/10	5/10	1/10
Vacheron Constantin	7/10	8/10	6/10	0/10
All brands	79/100	72/100	48/100	11/100

- **Rolex is the easiest brand** for the three stronger models (Opus and Sonnet 10/10, DeepSeek 8/10): it has few, well-known references.
- **Opus leads** on Patek Philippe (10/10), TAG Heuer (9 vs 6) and Jaeger-LeCoultre (7 vs 4 for Sonnet).
- **Sonnet leads** on Breitling and IWC (9 vs 7 each), so the two models' strengths differ.
- Opus got 17 watches right that Sonnet missed, and Sonnet 10 that Opus missed; together they solve 89 of 100.

Other listing fields

The same answers also fill other listing fields. These are much easier than the reference number:

Listing field	Claude Opus 5.5	Claude Sonnet 5.5	DeepSeek Flash	Claude Haiku 4.5
Movement (automatic / manual / quartz ...)	99/100	99/100	96/100	91/100
Case material	97/100	96/100	92/100	91/100
Strap / bracelet material	97/100	97/100	96/100	98/100

4. Can the model's confidence be trusted?

For automatic pre-filling, what matters is whether a model knows when it is right. The chart shows how often answers in each confidence band were exactly right.

Answers the model rated...	Claude Opus 5.5	Claude Sonnet 5.5	DeepSeek Flash	Claude Haiku 4.5
Confidence below 0.4	1 of 4 (25%)	13 of 26 (50%)	10 of 36 (28%)	0 of 1 (0%)
Confidence 0.4–0.6	22 of 30 (73%)	24 of 32 (75%)	16 of 32 (50%)	0 of 6 (0%)
Confidence 0.6–0.8	37 of 47 (79%)	24 of 30 (80%)	13 of 19 (68%)	8 of 74 (11%)
Confidence 0.8 and above	19 of 19 (100%)	11 of 12 (92%)	9 of 11 (82%)	3 of 19 (16%)

- **Opus is well calibrated at the top:** 19 answers at ≥ 0.8 , all 19 exactly right. Its lower-confidence answers are still mostly right, so it is cautious rather than overconfident.
- **Sonnet** is right on 11 of 12 at ≥ 0.8 but rarely claims that confidence, so a 0.8 cut-off would leave most of its correct answers unused. A lower threshold should be set per model.
- **Haiku is overconfident:** only 3 of its 19 answers at ≥ 0.8 were right. Its confidence cannot be used.

5. Why the models miss

Every wrong answer was classified automatically: *near miss* means at least 75% of the characters match the correct reference (typically the same model with a different dial, strap or size code); *different reference* is a valid-looking number for the right brand that is not close; *incomplete or another brand's* does not match the brand's reference format at all.

For the two strong models, most misses are near misses: the model recognises the watch but not the exact variant. The causes, with examples from the test set:

- Neighbouring variant.** Reference numbers encode dial colour, case metal and strap in their last digits. Models recall these codes from memory, and neighbouring variants differ by one or two characters.
- Previous generation.** Older references are more common online than new ones, so models often give the reference a watch had before it was updated.
- Invented numbers.** When unsure, a model sometimes produces a number that looks right but doesn't exist.
- Another brand's number.** Only DeepSeek and Haiku did this; Opus and Sonnet never did.
- Details a photo cannot show,** such as case size or white gold vs steel. These need to be confirmed with the seller.

SOLVED BY EVERY MODEL

#18 · Omega Seamaster Diver 300M 007 Edition

Answer key: 210.90.42.20.01.001

Model	Answer	✓	conf.
Opus 5.5	210.90.42.20.01.001	✓	0.93
Sonnet 5.5	210.90.42.20.01.001	✓	0.85
DeepSeek Flash	210.90.42.20.01.001	✓	0.85
Haiku 4.5	210.90.42.20.01.001	✓	0.85

All four models returned the exact reference: a well-known watch with a clearly visible dial.

NEAR MISS · NEIGHBOURING NUMBER

#57 · Breitling Navitimer Automatic 41

Answer key: A17326211B1P1

Model	Answer		conf.
Opus 5.5	A17326241B1P1	✗	0.60
Sonnet 5.5	A17326211B1P1	✓	0.55
DeepSeek Flash	A17326211B1P1	✓	0.90
Haiku 4.5	A17314101B1X1	✗	0.70

The model family is right; the digits that encode the dial variant differ by one character. References are recalled from memory, and variants of the same watch sit one digit apart.

OLDER GENERATION

#34 · Audemars Piguet Royal Oak Chronograph 41

Answer key: 26240ST.00.1320ST.02

Model	Answer		conf.
Opus 5.5	26331ST.00.1220ST.02	✗	0.60
Sonnet 5.5	26240ST.00.1320ST.02	✓	0.60
DeepSeek Flash	26331ST.00.1220ST.01	✗	0.35
Haiku 4.5	26300ST.00.1110ST.01	✗	0.75

26331ST is the previous Royal Oak Chronograph 41, replaced by the 26240 in 2022. Older references appear far more often in the models' training data.

INVENTED NUMBER

#46 · Tag Heuer Aquaracer Professional 200 Solargraph

Answer key: WBP1190.BZ0003

Model	Answer		conf.
Opus 5.5	WBP1114.BA0000	✗	0.30
Sonnet 5.5	WBP1113.BA0000	✗	0.35
DeepSeek Flash	WBP1110.BA0627	✗	0.40
Haiku 4.5	WAY201S.BA0927	✗	0.75

.BA0000 is not a real TAG Heuer bracelet code: when unsure, the models produce a plausible-looking reference. The prompt requires a best guess, so they cannot answer "unknown".

ANOTHER BRAND'S NUMBER

#28 · Patek Philippe Perpetual Calendar Chronograph

Answer key: 5270P-001

Model	Answer		conf.
Opus 5.5	5270P-001	✓	0.72
Sonnet 5.5	5204G-001	✗	0.20
DeepSeek Flash	IW371616	✗	0.30
Haiku 4.5	unknown	✗	0.45

DeepSeek answered a Patek Philippe with an IWC reference; Haiku gave up. Opus and Sonnet never mixed brands (100/100 brand right).

NOT VISIBLE IN A PHOTO · SIZE

#15 · Omega Constellation 39

Answer key: 131.10.39.20.02.001

Model	Answer		conf.
Opus 5.5	131.10.41.21.02.001	✗	0.50
Sonnet 5.5	131.10.39.20.02.001	✓	0.55
DeepSeek Flash	131.10.39.20.02.001	✓	0.45
Haiku 4.5	123.10.38.21.02.001	✗	0.75

39 mm vs 41 mm versions look the same on a wrist with nothing for scale. Opus picked the 41 mm reference.

NOT VISIBLE IN A PHOTO · CASE METAL

#36 · Audemars Piguet Code 11.59 Selfwinding

Answer key: 15210BC.00.A002CR.01

Model	Answer		conf.
Opus 5.5	15210BC.00.A002CR.01	✓	0.72
Sonnet 5.5	15210BC.00.A002KB.01	≈	0.15
DeepSeek Flash	15210ST.00.A002CR.01	✗	0.30
Haiku 4.5	15210ST.00.A002CR.01	✗	0.65

White gold (BC) and steel (ST) look alike in a photo. The weaker models answered steel; Sonnet got the metal but not the strap code (≈ = counted in the lenient score).

6. Answer-key rows to recheck

In these four rows, two or three of the strongest models agreed on the same different reference. That is a common sign that the answer key, not the models, may be wrong. They have not been re-verified yet. If any are corrected, all results can be re-scored at no cost from the saved answers. The headline numbers could move by up to 4 points for Opus and Sonnet.

ANSWER KEY TO RECHECK			
#12 · Omega Seamaster Diver 300M			
Answer key: 210.30.42.20.01.010			
Also accepted: 210.30.42.20.01.001			
Model	Answer		conf.
Opus 5.5	210.90.42.20.01.001	✗	0.72
Sonnet 5.5	210.90.42.20.01.001	✗	0.30
DeepSeek Flash	AB2010121B1A1	✗	0.28
Haiku 4.5	300M	✗	0.45
Opus and Sonnet both answered the “007 Edition” (210.90.42.20.01.001). The photo shows a mesh bracelet, which the 007 Edition is sold on; row 18 of the answer key is a 007 Edition on the same kind of bracelet.			

ANSWER KEY TO RECHECK			
#98 · Vacheron Constantin Overseas Perpetual Calendar Ultra-Thin			
Answer key: 4300V/120R-B064			
Model	Answer		conf.
Opus 5.5	4300V/120R-B509	✗	0.55
Sonnet 5.5	4300V/120R-B509	✗	0.60
DeepSeek Flash	4000V/210R-B966	✗	0.45
Haiku 4.5	5140R-001	✗	0.75
Opus and Sonnet both answered 4300V/120R-B509. The photo shows a pink-gold watch on a pink-gold bracelet; confirm which reference that combination is.			

ANSWER KEY TO RECHECK

#66 · Cartier Pasha de Cartier 41

Answer key: WSPA0009

Model	Answer		conf.
Opus 5.5	WSPA0013	✗	0.72
Sonnet 5.5	WSPA0013	✗	0.30
DeepSeek Flash	WSPA0009	✓	0.45
Haiku 4.5	W31044M7	✗	0.75

Opus and Sonnet both answered WSPA0013; Opus named it the 35 mm Pasha. Confirm the size and reference of this photo.

ANSWER KEY TO RECHECK

#76 · IWC Aquatimer Automatic 42

Answer key: IW328802

Model	Answer		conf.
Opus 5.5	IW329001	✗	0.60
Sonnet 5.5	IW329001	✗	0.40
DeepSeek Flash	2861.55.87	✗	0.15
Haiku 4.5	IW329001	✗	0.45

All three Claude models answered IW329001, the earlier Aquatimer Automatic 42. Confirm whether the photo shows the IW328802 or the earlier model.

7. Hardest watches

11 watches were missed by both Opus and Sonnet, and 9 by all four models. Only 6 were solved by all four.

#	Brand	Model	Reference (answer key)	Opus 5.5	Sonnet 5.5	DeepSeek Flash	Haiku 4.5
11	Omega	Speedmaster Moonwatch Professional	310.30.42.50.01.002	≈	≈	✓	✗
12	Omega	Seamaster Diver 300M	210.30.42.20.01.010	✗	✗	✗	✗
46	Tag Heuer	Aquaracer Professional 200 Solargraph	WBP1190.BZ0003	✗	✗	✗	✗
54	Breitling	Premier B01 Chronograph 42	AB0145211G1P1	✗	✗	✗	✗
66	Cartier	Pasha de Cartier 41	WSPA0009	✗	✗	✓	✗
76	IWC	Aquatimer Automatic 42	IW328802	✗	✗	✗	✗
82	Jaeger-LeCoultre	Master Ultra Thin Moon	Q1368430	≈	≈	≈	✗
86	Jaeger-LeCoultre	Reverso Tribute Duoface	Q3988482	✗	✗	✗	✗
88	Jaeger-LeCoultre	Rendez-Vous Night & Day	Q3468430	≈	✗	✗	✗
91	Vacheron Constantin	Overseas Self-winding	4520V/210A-B128	≈	≈	≈	✗
98	Vacheron Constantin	Overseas Perpetual Calendar Ultra-Thin	4300V/120R-B064	✗	✗	✗	✗

✓ exact · ≈ accepted look-alike · ✗ wrong or no answer.

8. Limitations

- **One pass per image.** These models don't always give the same answer twice; small differences (a few points) between models may be noise. The 24-point gap between Sonnet and DeepSeek is far beyond that; the 7-point gap between Opus and Sonnet is likely but not certain. Repeating each run 3 times would measure the spread.
- **100 photos from the web.** Real ChronoBay listing photos may be clearer or worse. Some photos may appear on the web pages the models learned from.
- **Answer key.** Four rows are flagged for rechecking (section 6).
- **DeepSeek** receives a lower-detail image (capped at 1,024 image tokens) and returns JSON without API enforcement, which partly explains its score.
- **Not yet tested:** GPT-6.1 Sol and Gemini 3.8 Flash (via OpenRouter), Sonnet 5.5 with thinking on, Opus 5.5 at high effort.

9. Recommendations and next steps

1. **Model choice:** Claude Opus 5.5 for best accuracy (\$22.30 per 1,000 listings), or Claude Sonnet 5.5 without thinking for volume (\$8.44 per 1,000). Do not use Haiku 4.5.
2. **Auto-fill policy:** pre-fill the reference automatically only above a per-model confidence threshold (0.8 for Opus); otherwise show the model's suggestion for the seller to confirm.
3. **Catalog lookup:** have the model identify brand and model, then pick the reference from ChronoBay's catalog. This removes invented and outdated numbers and narrows neighbouring variants to a short list.
4. **Ask what photos can't show:** case size and metal when the catalog lists several.

5. **Benchmark follow-ups:** recheck the four flagged answer-key rows; add a “right model” score; run GPT and Gemini; repeat the top two models 3× to measure run-to-run variation.

Appendix A. Every watch, every model

#	Brand	Model	Reference (answer key)	Opus 5.5	Sonnet 5.5	DeepSeek Flash	Haiku 4.5

Appendix B. Cost of this evaluation

Run	Images	Cost
Claude Opus 5.5 (full run)	100	\$2.23
Claude Sonnet 5.5, thinking off (full run)	100	\$0.84
Claude Haiku 4.5 (full run)	100	\$0.25
DeepSeek Flash (full run)	100	\$0.13
Test runs (3 images each, DeepSeek and Sonnet)	6	\$0.04
Total		\$3.49

Anthropic prices verified 30 Sep 2026. DeepSeek's cost uses the peak or off-peak rate in force when each call started. All raw model responses are saved, so results can be re-scored at no cost.

Generated from the saved benchmark runs (results/runs/*_full). Photos are reduced-size copies of the benchmark images, included for internal review only.
